1. Skills development – TVET makes a difference

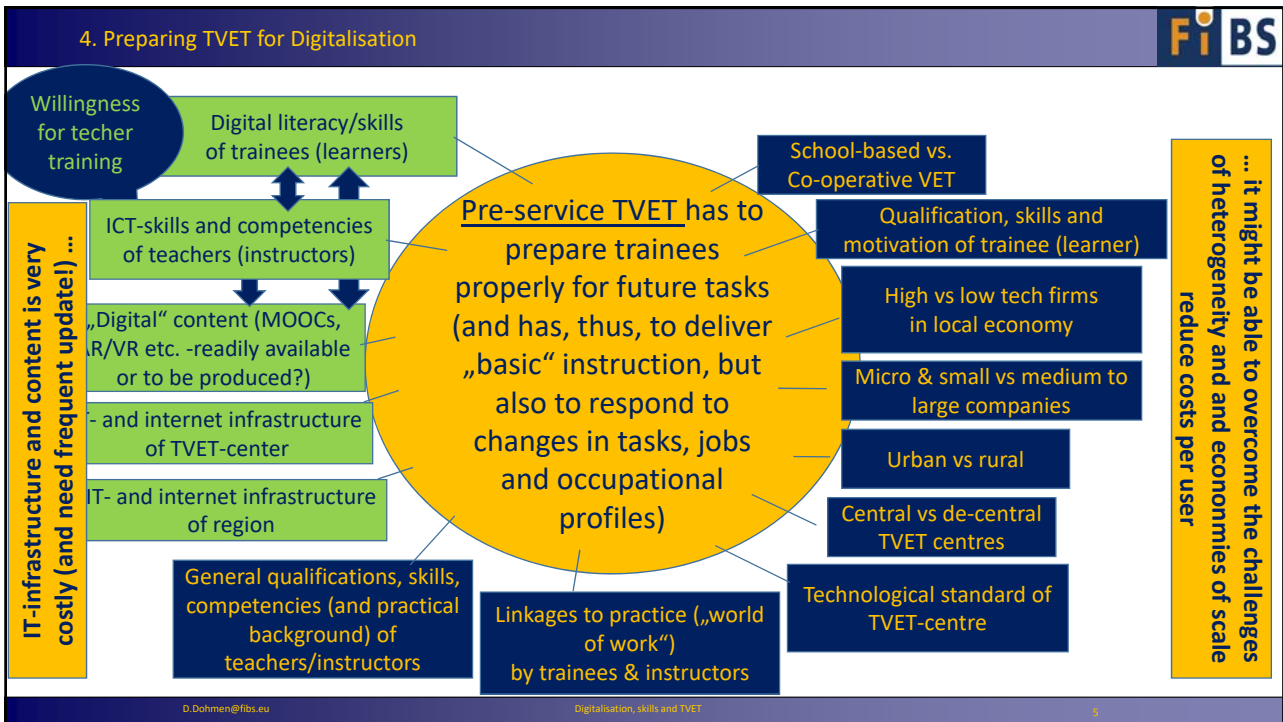

Countries with well established TVET-systems score better in PIAAC 2012 than in PISA 2000! (when looking at the birth cohort 1985 who participated as ...

Very recent research highlights that learning in the workplace (or work-based learning) and continuing TVET are drivers for innovation and growth ...

... whereas higher education makes no difference (it may even have a negative relationship)
